Presenting the breakthrough advances in microwave and wireless technology

The 12th annual IEEE Wireless and Microwave Technology (WAMI) Conference will be held on April 18 & 19, 2011 at the Hilton Clearwater Beach Resort in beautiful Clearwater, Florida. This year the conference technical program will include three tracks over two days consisting of tutorials and authors presenting state-of-the-art multidisciplinary research covering wireless, RF and microwave technologies. The WAMICON technical program and conference structure promotes networking opportunities and focused technical discussions with peers on an international level. The program includes an outstanding combination of keynote speakers, oral presentations, poster presentation, tutorials and an exhibit area.

Conference Highlights:

- Keynote Speakers
 - Dr. Sanjay Raman – DARPA
 - Dr. Bruce Carlsten – Los Alamos National Laboratory
- 5 Tutorials Included with Registration
 - Electromagnetic Metamaterials and their Microwave Applications – Dr. Christophe Caloz
 - X-Parameters: The new paradigm for interoperable measurement, modeling, and simulation of nonlinear microwave and RF components – Dr. David E. Root
 - Terahertz in Space and Application on Earth – Dr. Peter Siegel
 - Microwave Sensors for Industrial Applications – Dr. Reinhard H. Knoechel
 - Linear Power Amplifier Design for Mobile Communication – Dr. Bumman Kim
- 10 Technical Sessions
- Invited Talks on Filters, Power Amplifiers, RF MEMS and Circuit Integration
- Conference banquet on the beach
